DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 9 recites the limitation "the end faces" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections – 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

5. Claims 1, 4-12, and 27-29 are rejected under 35 U.S.C. 102(a) as being anticipated by Zierolf (US 6,333,699).

Regarding claim 8, Zierolf discloses a string (10) of joined tubulars (12), comprising a marker in the form of a radio frequency identification device (30) arranged in a cavity (20) that has been created into an end surface of at least one of the tubulars,

and wherein the end surface is pressed against or welded to an end surface of an adjacent tubular (figure 1, col. 8, lines 7-26).

Regarding claim 10, Zierolf discloses wherein a plurality of joints (14) are provided with markers (figure 1).

Regarding claim 11, Zierolf discloses wherein each marker transmits a radio, magnetic, radioactive or other detectable signal which is different to the signal transmitted by any other marker (col. 8, lines 48-62).

Regarding claim 12, Zierolf discloses wherein the string is a string of oilfield and/or well tubulars (figure 1, 7, line 66 through col. 8, line 6).

Regarding claims 1, 4-7, 27-29, the claimed method steps would have been inherent in the product structure as stated in claims 8 and 10-12 above above.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2-3 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zierolf.

Regarding claim 9, Zierolf discloses the end surfaces are substantially disk shaped but fails to disclose it being joined by forge welding. Since Zierolf discloses a coupling sleeve (18) for securing the two ends (16) together (figure 1, col. 8, lines 7-12).

it would have been obvious to a person having ordinary skill in the art at the time the invention was made to use the other joint technique, such as forge welding, to joint two ends together for the purpose of securing those two ends together because it is just an obvious design choice.

Regarding claims 2-3, the claimed method steps would have been inherent in the product structure as stated in claim 9 above.

Response to Arguments

8. Applicant's arguments with respect to claims 1-12, and 27-29 have been considered but are moot in view of the new ground(s) of rejection.
